Insurance: Mathematics and Economics 23 (1998) 313

INSURANCE
MATHEMATICS & ECONOMICS

Author Index Volume 23

(The issue number is given in front of the page numbers)

Alvarez, L.H.R., Zero coupon bonds and affine term structures: reconsidering the one-factor model (1) 85– 90
Ambagaspitiya, R.S., Compound bivariate Lagrangian Poisson distributions (1) 21– 31
Ambagaspitiya, R.S., On the distribution of a sum of correlated aggregate claims (1) 15– 19

Barber, J.R. and **M.L. Copper,** A minimax risk strategy for portfolio immunization (2) 173–177
Beirlant, J., Y. Goegebeur, R. Verlaak and **P. Vynckier,** Burr regression and portfolio segmentation (3) 231–251
Blake, D., Pension schemes as options on pension fund assets: implications for pension fund management (3) 265–288
Bricker, D.L., see Xu, L. (2) 119–139

Cai, J. and **J. Garrido,** Aging properties and bounds for ruin probabilities and stop-loss premiums (1) 33– 43
Chaubey, Y.P., J. Garrido and **S. Trudeau,** On the computation of aggregate claims distributions: some new approximations (3) 215–230
Copper, M.L., see Barber, J.R. (2) 173–177

Garrido, J., see Cai, J. (1) 33– 43
Garrido, J., see Chaubey, Y.P. (3) 215–230
Goegebeur, Y., see Beirlant, J. (3) 231–251
Goovaerts, M., see Spreeuw, J. (1) 59– 69
Goulet, V., A note on optimal parameter estimation under zero-excess assumptions (2) 111–117

Kloek, T., Loss development forecasting models: an econometrician's view (3) 253–263
Kortanek, K.O., see Xu, L. (2) 119–139

Lefèvre, C., see Picard. P. (2) 157–172
Lin, X.S., Double barrier hitting time distributions with applications to exotic options (1) 45– 58
Lin, X.S., see Willmot, G.E. (1) 91–110

Pervozvansky Jr., A.A., Equation for survival probability in a finite time interval in case of non-zero real interest force (3) 289–297
Picard P. and **C. Lefèvre,** The moments of ruin time in the classical risk model with discrete claim size distribution (2) 157–172
Powers, M.R. and **M. Shubik,** On the trade-off between the law of large numbers and oligopoly in insurance (2) 141–156

Shubik, M., see Powers, M.R. (2) 141–156
Spreeuw, J. and **M. Goovaerts,** Prediction of claim numbers based on hazard rates (1) 59– 69

Trudeau, S., see Chaubey, Y.P. (3) 215–230

Usábel, M.A., Applications to risk theory of a Monte Carlo multiple integration method (1) 71–83

Verlaak, R., see Beirlant, J. (3) 231–251
Vynckier, P., see Beirlant, J. (3) 231–251

Willmot, G.E. and **X.S. Lin,** Exact and approximate properties of the distribution of surplus before and after ruin (1) 91–110

Xu, L., D.L. Bricker and **K.O. Kortanek,** Bounds for stop-loss premium under restrictions on I-divergence (2) 119–139

Young, V.R., Families of update rules for non-additive measures: Applications in pricing risks (1) 1– 14

Elsevier Science B.V.
